

## Imagine an online environment with many educational complexes (eduPLEX).

EduPLEX enables your school to "mirror" its learning culture into a virtual or "cloud" platform.

While there are many schools in eduPLEX, your school is treated as a unique Institution. Each school has its own identity and customised

content. Staff contribute learning activities and share with students and colleagues.

Irrespective of the device being used, learners and teachers are connected. They can see, share, message and add feedback to digital learning without having to worry about installed software or school infrastructure. Internet access is all that is required.

## FEATURES

## DESCRIPTION

## STUDENT SIDE

## TEACHER SIDE

### ePortfolios (Digital Portfolio Pages)
